HEALTHCARE

My Surgery Healthcare

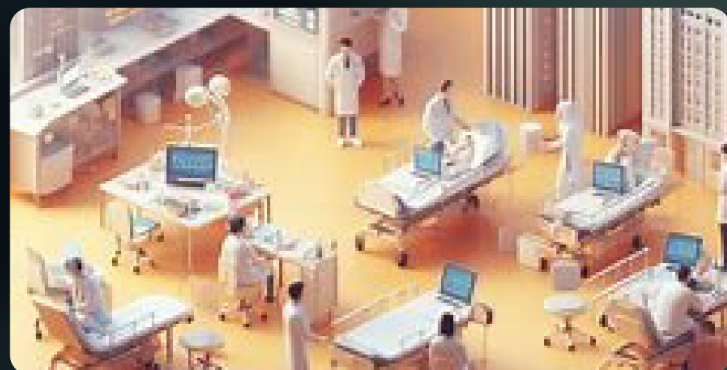

My Surgery Healthcare (MSH) is a novel healthcare company that partners and enables patients, insurers, employers, and governments to save over **87%** on diagnosis and surgeries by leveraging internationally accredited quality private healthcare through medical tourism in addition to slashing wait time from weeks or months to near-zero for procedures.

Save
87%

We aggregate, standardize, and streamline every step of the diagnosis, treatment, and travel with our services and partnerships in every stage of the value chain, including consultation, surgery, hospitalization, flights, visa documentation, and stay.

We make the entire process as frictionless, seamless, and 'single-step-like' as possible for both health insurance providers and patients whilst making it extremely cost-effective and quick.

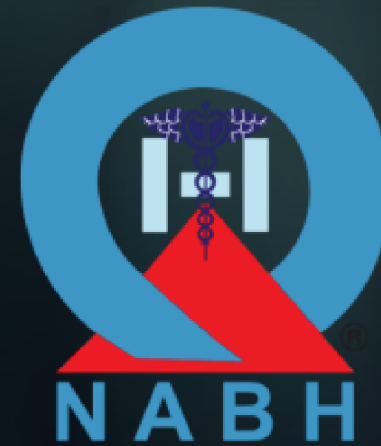

MSH is at the vanguard of the global transition from product outsourcing to service outsourcing in the healthcare industry. MSH is the first company to aggregate the fragmented and unorganized multi-billion-dollar global medical tourism industry.

Quality of Healthcare in India

The facilities, frontier technologies, and doctors in private healthcare in India are among the best in the world, e.g., the success rate for Coronary Artery Bypass Graft (CABG) is 98% in India, on par with America (97-98%). Specialized Indian doctors commonly have internationally acquired certifications. Many Indian hospitals have JCI and NABH accreditations. India is among only 12 countries worldwide, including Australia, Canada, and the United Kingdom, with ISQua-accredited health standards (1).

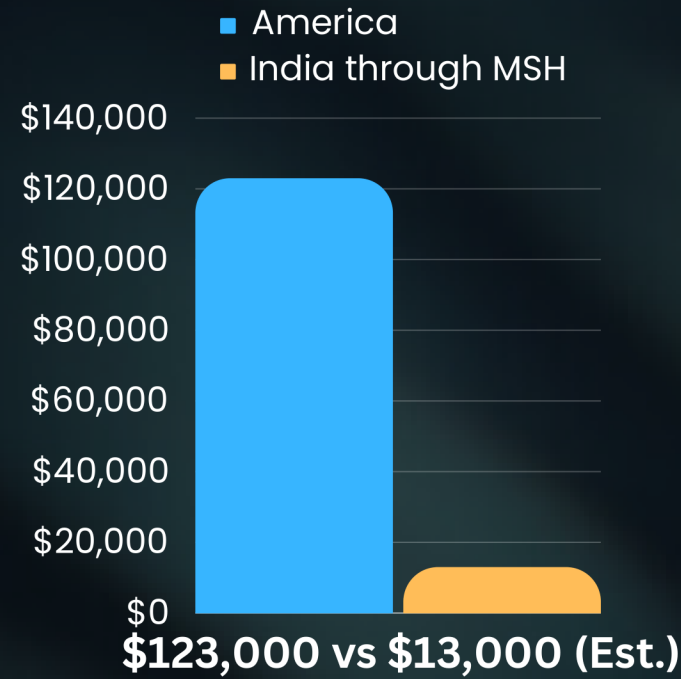

Currently in the top 6 medical tourism destinations in the world and growing, India has about 1 million medical tourists yearly for its quality, low wait time, vast specialties, luxury in-patient rooms, doctors proficient in English, and cost efficiency, generating \$6bn annually and expected to grow to \$13bn in '26.

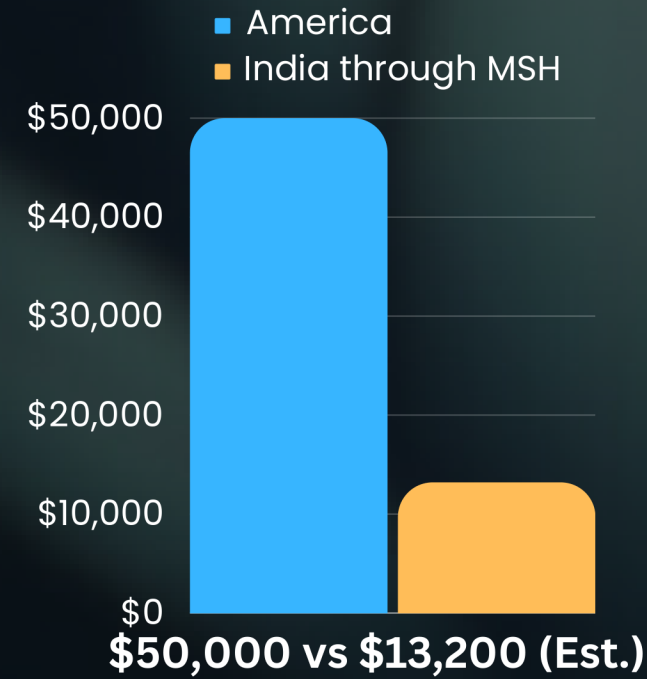

We at **MSH** exclusively collaborate with highly accredited senior doctors and specialized top-tier hospitals chosen based on our local resources and firsthand knowledge. Our on-the-ground expertise surpasses the reliability of paid Google reviews, which are prevalent and often lack accuracy.

Our listed prices include round-trip flights, luxury boutique or 5-star accommodation, surgery, doctor fees, hospital charges, implants/medical equipment if required, visa assistance, local on-ground and hospital assistance and coordination, and local transportation, including two-way airport transfers.

For Insurance Companies

By partnering with **My Surgery Healthcare (MSH)**, insurance companies can save over 87% on payout costs. E.g., close to 400,000 heart bypass surgeries (CABG) are done in America every year, taking the average to be \$123,000 (src: [livelyme.com](https://www.livelyme.com)) – partnering with MSH, procedures are carried out for a tenth of that price (less than \$12,000), saving 90%, thereby potentially saving billions of dollars from heart surgeries alone.

Why Patients Would Pick The Medical Tourism Route Through Their Insurers

By offering the option of medical travel with **MSH** to patients, insurers can pay for 100% of the costs (including surgery, hospital stay, travel, accommodation, local transportation, and on-ground support). This saves the patient all deductibles, co-payments, and out-of-pocket expenses. Choosing **MSH** also eliminates any wait time, which is crucial for time-sensitive surgeries. In addition, insurers can offer a cash bonus to choose medical travel which could aid in post-op care. Packages include luxury boutique or 5-star hotels and activities for relaxing.

For Patients

The potential savings on surgical expenses are substantial and can reach over 87%. **My Surgery Healthcare** takes charge of all facets, including travel arrangements, pre and post-travel coordination, assistance during treatment and hospitalization, and doctor and stay coordination.

At **MSH**, booking a procedure is a streamlined, single-step-like experience. Each patient is assigned a dedicated point of contact to expedite communication and provide essential support during their treatment and stay. Additionally, every patient is provided with an in-person assistant throughout their stay.

Exclusive MSH Advantages

In addition to our virtual and manpower infrastructure on the ground, we've established partnerships with hospitals, hotels, and travel organizers to make the entire experience affordable and seamless.

MSH is a far more reliable, transparent, hassle-free, ethical, and qualitatively high-end way than older traditional medical travel agents and websites with inaccurate floating prices, poor coordination, stressful and cumbersome booking methods, quality lapses, poor accommodation, exploitative and unnecessary business practices.

Quality

Our commitment extends to offering fixed and transparent pricing, customizable packages that remain within the estimated costs, luxury accommodation, and excellent support, providing clarity and reliability throughout the process.

Reliability

We are the only company helping insurers and patients save substantially at every step of the chain through a streamlined, aggregated, standardized service.
